III. TOTAL POPULATION POTENTIALLY AFFECTED: 536

IV. COMMENTS

Roadway Trucking Terminal has a history of illegal dumping on their property, however this site has not been inspected since June, 1980. I recommend that ~~given~~ this site be given a medium priority rating and an inspection be scheduled.

SUBJECT: Roadway Trucking Terminal

#### Executive Summary

Roadway Trucking Terminal is owned and operated by Roadway Express of Akron Ohio. The terminal provides urgent and emergency repairs for the trucks of the Express Company.

On June 23, 1980 the Agency received a complaint from a fire inspector for the Sauk Village Fire Department. The inspector stated that chemical and fuel dumping has been taking place behind the terminal. Further, drums which reportedly contained fuel were present at the edge of a large pond. An oil film was present on the pond.

On June 25, 1980 representatives of USEPA conducted a site inspection. During that inspection 67 cylinders containing Terr-o-cide 93.5, a chloropicrin mixture, was found to be leaking. These cylinders were part of a shipment enroute to Vollard Farm, Marathon, Wisconsin.

In addition, during the June 25, 1980 inspection it was noted that diesel fuel had run off the pad where refueling takes place and was flowing into the above mentioned pond.

Roadway Trucking was notified that they had until August 25, 1980 to present to USEPA a clean-up plan. During the course of my investigation, I was unable to locate any type of response in regard to the August 25, 1980 deadline. I recommend that this facility be given a medium priority rating and that an inspection be scheduled.
